

Do you have Atopic Dermatitis and have been treated with Protopic® (tacrolimus ointment)?

A long-term safety research study is being conducted at this office to evaluate the safety of Protopic®.

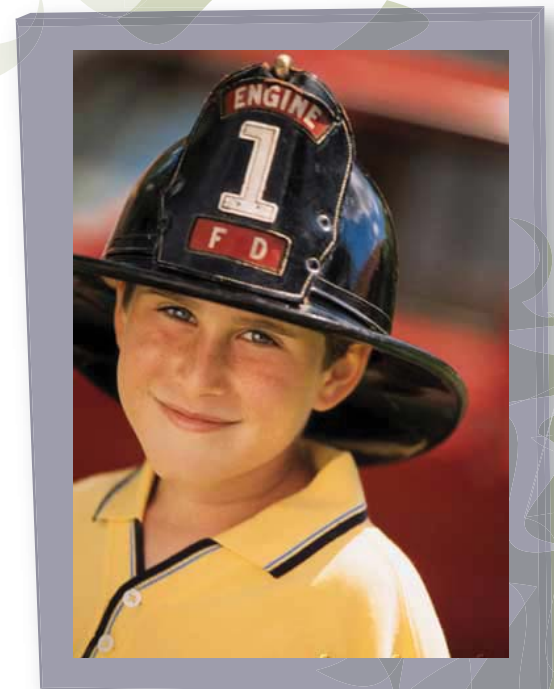

Have you used Protopic®:

- Before the age of 16, and
- For at least 6 weeks for the treatment of atopic dermatitis?

If so, you may qualify to participate in this study.

Qualified participants will receive:

- 1 physical examination every year and 1 dermatological examination every other year for the next 10 years
- Study participation with little to no interference in your daily activities
- Gift cards following a paper or telephone interview, conducted every 6 months.

For more information or to enroll in this study, please talk to your doctor about the APPLES study.
